Ahmed **sameh**

Summary

Student at the Faculty of Computers and Information, I have a simple experience in the field of Front End web development and a freelance work on websites
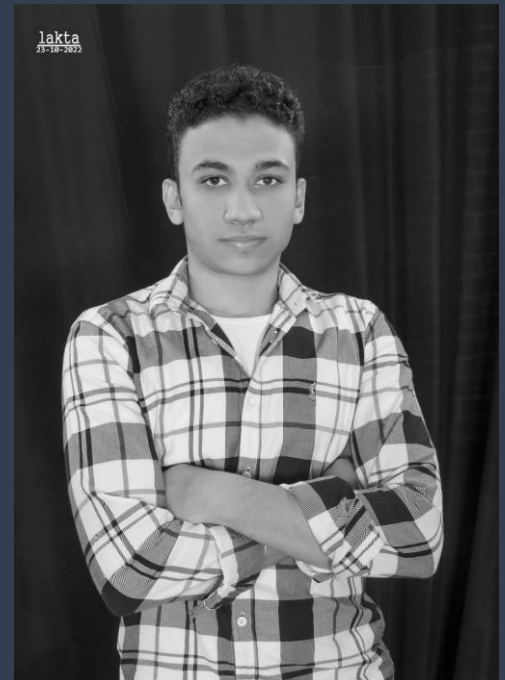

Experience

student - 09/2019 to 05/2023
University : Assiut-University

- In the first year of college
  - I learned the basics of computers, physics and mathematics.
  - I participated in the skill of solving the problem at the university through codeForces for a sufficient time .

- In the second year of college
  - I started in the field of programming through the C++ language, solving the problem, and through college, solving tasks in the C++ language, and it was the first language I studied.
  - During the second semester, I started learning software engineering and how to manage projects and work with an integrated team .

- In the third year of college
  - I started learning about python and knowing how easy it is from other languages through college and doing a website project using Django .
  - In the second semester, I moved to C# and did a code scanner and some cmd .
  - I moved to the interesting web work and found something interesting in creativity and designs through the field of Front End.
  - Create designs in some web languages .
